VIJESH S

Coimbatore, TN | +91-9384596466 | viju7122006@gmail.com | github.com/Vijesh-CDmaster | linkedin.com/in/vijesh-s

PROFESSIONAL SUMMARY

Full-stack developer and AI/ML engineer building production systems for software reliability and code intelligence. Strong expertise in Next.js, Node.js, Python, and cloud infrastructure (AWS, Docker, Kubernetes). Built Verya—an AI Trust Operating System with append-only ledger architecture and pgvector integration—and DevLense, an AI-powered code analysis platform. Active open-source contributor to TensorFlow, CNCF, and Meshery ecosystems.

EXPERIENCE

Data Science Intern | Sangam Soft Solutions June 2026 – Present
Engineered patent-based dropout detection ML system on 3,500+ records with 15 features. Implemented XGBoost classifier achieving 87% accuracy with class balancing for imbalanced data. Deployed predictive pipeline as REST API (Flask) for real-time risk flagging. Integrated data preprocessing (feature scaling, missing value imputation) and model evaluation (confusion matrix, ROC-AUC). System deployed for early intervention workflows.

Open Source Contributor | TensorFlow, CNCF Automation, Meshery 2026 – Present
Contributed TypeScript, Python, and infrastructure-as-code enhancements across TensorFlow ML framework, CNCF automation tooling, and Meshery cloud-native platform. Enhanced developer workflows, improved documentation, and collaborated on production infrastructure features within the cloud-native ecosystem.

FEATURED PROJECTS

Verya – AI Trust Operating System | github.com/Vijesh-CDmaster/verya
Self-governing AI system that validates workflows, selects optimal models, executes tasks, and records decisions in an append-only AI Trust Ledger. Tech: Next.js, Fastify, Neon PostgreSQL, pgvector, Redis/BullMQ, AWS. Implemented hash-chained trust ledger for verifiable AI decision history. Features workflow validation, model selection logic, and confidence scoring.

DevLense – AI-Powered Code Intelligence Platform | github.com/Vijesh-CDmaster/DevLense
Analyzes codebases using LLM APIs and GitHub API to provide architecture insights, impact analysis, and security/quality metrics. Built with Next.js, TypeScript, Node.js, PostgreSQL, Docker, and AWS. Integrates LLM-powered dependency analysis and generates actionable insights for developers.

TempleConnect – Smart Crowd Management Platform | github.com/Vijesh-CDmaster/Temple_Crowd_Management
Full-stack React + Node.js + MongoDB platform for temple darshan booking with virtual queues, token generation (QR codes), geolocation-based temple maps, and real-time slot management. Implemented dynamic slot availability tracking and user history analytics dashboard.

EcoSort – AI Waste Segregation System | github.com/Vijesh-CDmaster/EcoSort-Vision
Computer vision ML system using TensorFlow & OpenCV for automated waste classification (recyclable, organic, hazardous, mixed). Designed multi-stage segregation workflow with Flask API and real-time detection dashboard. 2nd Prize – 11:11 Hackathon, VIHANSA 2026.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, TailwindCSS, HTML5/CSS3

Backend: Node.js, Express.js,Flask, FastAPI, REST APIs

Databases & Storage: PostgreSQL, MongoDB, NoSQL, Neon, pgvector, Firebase

AI/ML: TensorFlow, Scikit-Learn, XGBoost, Computer Vision, OpenCV, LLM APIs

Cloud & DevOps: AWS ,Docker, Kubernetes, GitHub Actions, Git, CI/CD

EDUCATION

B.Tech in Artificial Intelligence & Data Science

KGiSL Institute of Technology, Coimbatore | Expected May 2028 | CGPA: 7.83/10

ACHIEVEMENTS & RECOGNITION

Hackathon Achievements: 2nd Prize – 11:11 Hackathon (EcoSort), VIHANSA 2026. Participated in 9+ hackathons: Smart India Hackathon, INNO HACK, Hackspora 2025, PyExpo 2025, SRCAS 24-Hour, AURELION, Adobe, IQOO, Bharat Build.

Professional Development: Currently pursuing for AWS Certified Cloud Practitioner certification. Completed IBM Coursera specializations: Data Analysis with Python, Python for Data Science & AI, Introduction to Software Engineering, Cloud Fundamentals, Linux Shell, Exploratory Data Analysis, Networking & Storage, Git & GitHub, DevOps, Machine Learning. LinguaSkill B1.

Online Judge & Coding: Active on LeetCode: leetcode.com/u/VIjesh_07/
